- Do not wet the pigmented areas for 7 days.
- Do not put makeup on pigmented areas for 7 days.
- 1st. day: Clean the area with the slightly moistened gauze and then apply the vitamin every hour.
- 2nd. day: Clean the area with the slightly moistened gauze and then apply the vitamin every 2 hours. (Before going to sleep clean and apply Cavilon Cream).
- 3rd. day: Only apply the vitamin 4 times a day until 7 days have passed.

**\* Cavilon is not applied in the makeup effect.**

# MICROPIGMENTATION

## IN LIPS TREATMENT CARE

### RECOMMENDATIONS

- Do not rub or scratch pigmented areas.
- Do not expose yourself to the sun or UVA rays for 7 days.
- Keep the area clean without contact with irritating or highly colored foods and drinks, such as red wine, coffee, beets for 7 days.

### BEFORE

- Take Valacyclovir 1 pill every 12 hours for 5 days, (starting 48 hours before the procedure).

### AFTER

- Moisturize the area with vitamin 3 days whenever necessary.

### IMPORTANT

- During the 3rd-4th day, color perception may be 2 to 3 shades darker due to the accumulation of pigment on the surface of the skin.

# MICROPIGMENTATION

IN EYES TREATMENT CARE

## RECOMMENDATIONS

- On the first day you can apply dry cold (ice bag) for 5 minutes.
- Do not rub or scratch pigmented areas.
- Do not expose yourself to the sun or UVA rays for 7 days.
- Do not put makeup on pigmented areas for 7 days.

## AFTER

- In case of eyelid inflammation, it is recommended to take celestamine NS every 8 hours for 1 or 2 days. (Before consuming any type of medication, consult the Oneline team of doctors) at the number: 998 155 6040
- From the 1st. to the 7th day keep the area clean.

## IMPORTANT

- During the first week, color perception may be 2 to 3 shades darker due to the accumulation of pigment on the surface of the skin.
- During the second week, color appreciation may vary from a dull gray to a bluish tone and it may take up to 2 weeks for us to see the final result.
